# INTERFOR ELITE FINELINE PANELING

Interfor Elite Fineline Paneling is designed to target one of the hottest trends in building today. Our Fineline Cedar Paneling is engineered to provide the authentic shiplap look and feel. The paneling has a 1/8" gap on both the smooth and resawn face, offering a truly reversible product that offers the ultimate in quality appearance. It combines the exceptional beauty and outstanding performance of Western Red Cedar with our consistent manufacturing excellence. As one of the world's largest suppliers of Western Red Cedar, Interfor has a reliable fiber supply to provide the perfect product when it is needed.

## Best Choice for Appearance

Western Red Cedar offers beauty, rich color and exceptional building properties, and it is manufactured to exacting standards through our kiln and planer facilities. Properly finished and maintained, Western Red Cedar ages gracefully and lasts for years.

Interfor Elite Fineline Paneling features straight, even grain; uniform texture, and sound, tight knots that will not fall out over time. It is reversible — smooth on one face and saw-textured on the other — and can be installed with either side exposed. The sawn face adds an appealing texture to the finished project.

## Best Choice for Quality and Performance

One of the easiest woods to work, Western Red Cedar is dimensionally stable, lightweight, strong and versatile, and is naturally resistant to decay and insect damage. Interfor Elite Fineline Paneling is easy to saw and glue, and accepts nails and other fasteners.

The cellular structure and insulation value of Western Red Cedar means that buildings featuring Cedar paneling, ceilings or siding

are cooler in the summer and warmer in the winter. The wood also suppresses and absorbs sound.

Tongue and groove is widely used for its appearance and versatility. Interfor Elite Fineline Paneling can be installed vertically, horizontally or diagonally; each method giving a distinctly different look.

## Best Choice for Time and Cost Savings

Interfor Fineline Paneling makes an excellent alternative to drywall. It also takes a fraction of the time to install compared to square-edged products, which is a benefit to any cost-conscious builder.

## Best Choice for the Environment

Wood from responsible sources is by far the best building choice. Wood grows naturally, it is recyclable and renewable, and its cellular structure captures and stores carbon. Interfor meets the highest environmental standards, and our quality Western Red Cedar comes from forests in British Columbia that are third-party certified.

| Size (nominal inches) | Size (actual inches) | Dressing                  | Seasoning  | Pieces per bundle | Pieces per package | Length (feet) |
|-----------------------|----------------------|---------------------------|------------|-------------------|--------------------|---------------|
| 1 x 4                 | 1 1/16 x 3 3/8       | Smooth Face / Resawn Back | Kiln Dried | 6                 | 390                | 6-20 PTL      |
| 1 x 6                 | 1 1/16 x 5 3/8       | Smooth Face / Resawn Back | Kiln Dried | 6                 | 240                | 6-20 PTL      |
| 1 x 8                 | 1 1/16 x 7 3/8       | Smooth Face / Resawn Back | Kiln Dried | 6                 | 180                | 6-20 PTL      |

## Finishing and Maintenance:

- Western Red Cedar is pitch and resin-free, making it an excellent base for paints and stains.
- Western Red Cedar should never weather for more than two weeks before finishing. All finishes adhere and perform better when applied to fresh, unweathered wood.
- Power washers are not recommended for use on Western Red Cedar.
- For best results, Western Red Cedar should be coated on all sides before installation. Factory finishing, where available, is preferred.
- Corrosion-resistant nails such as hot-dipped galvanized aluminum and stainless steel are recommended.
- More detailed information is available from the Western Red Cedar Lumber Association website at [www.realcedar.com/resources/brochures-literature/](http://www.realcedar.com/resources/brochures-literature/).

Elite Fineline (1/8" Gap) Paneling

Interfor is a growth-oriented lumber company with operations in Canada and the United States. The Company has annual production capacity of 3 billion board feet and offers one of the most diverse lines of lumber products to customers around the world.
