

CEDAR

Interfor Clear SOLID BEVEL SIDING

Interfor Clear Solid Bevel Siding delivers consistent and superior quality, adding beauty and prestige to any project that cannot be matched. It is manufactured to exacting standards through our kiln and planer facilities. As one of the world's largest suppliers of Western Red Cedar, Interfor has a reliable fiber supply to provide the perfect product when it is needed.

Interfor Clear SOLID BEVEL SIDING

Best Choice for Appearance

Interfor Clear Solid Bevel Siding delivers the ultimate in distinctive street appeal and quality appearance for prestigious, up-market applications. It is the product of choice for architects and builders, and is featured on award-winning projects across North America.

Western Red Cedar delivers beauty, rich color and exceptional building properties. Properly finished and maintained, it ages gracefully and lasts for years.

Best Choice for the Environment

Wood from responsible sources is by far the best building choice. Wood grows naturally, it is recyclable and renewable, and its cellular structure captures and stores carbon. Interfor meets the highest environmental standards, and our Western Red Cedar comes from forests in British Columbia that are third-party certified.

Western Red Cedar's natural preservatives protect against decay and insects so harmful chemical treatment is not needed.

Best Choice for Quality and Performance

One of the easiest woods to work with, Western Red Cedar is dimensionally stable, lightweight, strong and versatile, and is naturally resistant to decay and insect damage. Interfor Clear Solid Bevel Siding features straight, even grain and uniform texture. It is easy to saw and glue, and accepts nails and other fasteners.

The cellular structure and insulation value of Western Red Cedar means that buildings featuring Cedar paneling, ceilings or siding are cooler in the summer and warmer in the winter. The wood also suppresses and absorbs sound.

Interfor Clear Solid Bevel Siding is kiln dried so it can be prefinished immediately, and it is available in the following primary grades:

- Clear Vertical grain and "A" Clear Mixed grain are graded for the smooth face; and
- Texface is graded for the resawn face.

Size (inches)	Butt (inches)	Net Width (inches)	Tip (inches)	Pieces per bundle	Volume per package	Lengths
½ x 4*	⅞	3 ⅞	⅝	10	4,750 fsm	3 - 20 O&E
½ x 6**	⅞	5 ⅞	⅝	10	4,750 fsm	3 - 20 O&E
½ x 8	⅞	7 ⅞	⅝	10	4,750 fsm	3 - 20 O&E
¾ x 8	¾	7 ⅞	⅝	6	3,250 fsm	3 - 20 O&E
¾ x 10	¾	9 ⅞	⅝	6	3,250 fsm	3 - 20 O&E

* ½ x 4 Bevel is available as A & Btr Max 15% B Clear

** ½ x 6 Bevel - 6'-20' available on request

Finishing and Maintenance:

- Western Red Cedar is pitch and resin-free, making it an excellent base for paints and stains.
- Western Red Cedar should never weather for more than two weeks before finishing. All finishes adhere and perform better when applied to fresh, unweathered wood.
- Power washers are not recommended for use on Western Red Cedar.
- For best results, Western Red Cedar should be coated on all sides before installation. Factory finishing, where available, is preferred.
- Corrosion-resistant nails such as hot-dipped galvanized aluminum and stainless steel are recommended.
- More detailed information about finishing and maintenance is available from the Western Red Cedar Lumber Association website at www.realcedar.com/resources/brochures-literature/.

Interfor is a growth-oriented lumber company with operations in Canada and the United States. The Company has annual production capacity of 3 billion board feet and offers one of the most diverse lines of lumber products to customers around the world.
