

# INTERFOR FINELINE PANELING

# INTERFOR FINELINE PANELING

Interfor Finline Paneling has stunning appearance attributes that makes it the paneling of choice for high-end builders worldwide. The panel is two sided — Finline on the face and WP4 on the back — which provides for both the contemporary shiplap look and the traditional V-Joint look, in one reversible pattern. The Paneling is manufactured from high-quality wood and is milled to an impeccable silky texture. The two-sided or dual profile and the wood's ability to readily accept semi-transparent stain or solid paint allows builders to easily create the popular "nickel gap" look. Interfor Finline Paneling is an excellent choice for applications such as interior walls, ceilings and soffits.

## Best Choice for Appearance

With its classic elegance, Interfor Finline Paneling adds allure to any architectural style. The Paneling is hand selected to showcase the small tight-knot characteristics of the finest Spruce and Pine. Both species highlight the subtle yet beautiful contrast between reddish brown knots and off-white fiber. Interfor Finline Paneling takes stain and paint easily and is available in three different widths — which provides a wide variety of design options.

## Best Choice for Quality and Performance

Interfor Finline Paneling is milled to an impeccably silky texture. Spruce and Pine have straight grains, glue easily and take most finishes beautifully. The Paneling is meticulously sub-bundled and end-capped to protect the milling quality.

Imperial Size (nominal inches)	Imperial Size (actual inches)	Pattern & Dressing	Pieces Per Bundle	Pieces Per Lift	Length (feet)
1 x 4	2 <sup>3</sup> / <sub>32</sub> x 3 <sup>3</sup> / <sub>8</sub>	Finline / WP4	6	234	8-16 PTL
1 x 6	2 <sup>3</sup> / <sub>32</sub> x 5 <sup>3</sup> / <sub>8</sub>	Finline / WP4	4	160	8-16 PTL
1 x 8	2 <sup>3</sup> / <sub>32</sub> x 7 <sup>1</sup> / <sub>8</sub>	Finline / WP4	4	120	8-16 PTL

## Best Choice for Time and Cost Savings

Interfor Finline Paneling makes an excellent alternative to drywall. It also takes a fraction of the time to install compared to square-edged products, which is a benefit to any cost-conscious builder.

## Best Choice for the Environment

Wood from responsible sources is by far the best building choice, and Interfor meets the highest environmental standards. Our Finline Paneling comes from either forests in the Interior of British Columbia that are independently certified to the Sustainable Forestry Initiative Inc. (SFI®) standard or forests in Central Oregon that are selectively harvested, allowing young trees to reseed and mature naturally.

This shows Interfor's Finline profile in 1x6.

## Installation and Finishing Tips

- Interfor Finline Paneling is an excellent choice for many applications, including interior walls, ceilings and soffits. It can be installed vertically, horizontally or diagonally.
- Knots should be sealed before painting to prevent them from bleeding through the finished surface.
- After the wood has achieved equilibrium moisture content, and before it is installed, a coating on all surfaces is strongly recommended to help protect the wood from water penetration.
- Factory finishing, where available, is strongly recommended.

Interfor is a growth-oriented lumber company with operations in Canada and the United States. The Company has annual production capacity of 3 billion board feet and offers one of the most diverse lines of lumber products to customers around the world.
