

- Clear finger-jointed Chilean radiata pine nickel gap
- Double primed with perfectly clear face for a pristine smooth painted finish
- Custom designed tongue and groove with a perfect 1/8" nickel gap on face, and WP4 pattern on the back
- Small 45 piece units with 16 foot lengths for complete ceiling and wall coverage
- A full 3/4" thick providing dimensional stability and rigidity
- Excellent for both walls and ceilings
- Soft and receptive radiata wood that is carpenter friendly and easy to cut, miter, and nail
