- Exceptional moisture vapor transmission (MVT) - it breathes so moisture can escape the wall cavity.
- Superior tear strength - proven to withstand heavy winds and is almost five times stronger than the leading competitive wrap.
- Optimal surfactant and UV resistance - reduces the damaging effects that oils and tannins from cedar siding, cement siding, stucco, brick, and soaps from power washing can have on the system's ability to block bulk moisture penetration; stands up to the beating sun on the job site for up to 6 months without degradation.
