

PROFILE LEGEND

P46V V-NOTCH 6" PLANK

Description: A broad plank option featuring the standard V-shaped notch contour to create a well connected cladding profile.

Width: 6" / 12.24cm

Length: 16' (192") / 4.8768m (487.68cm)

P41 PERFORATED STARTER J TRIM

Description: Designed to help installers hang the first level of siding or panels on a vertical wall.

P13 GENERAL J TRIM

Description: General J Trim for the top edge of doors, windows, or wall siding.

P12 TWO-PIECE INTERMEDIATE TRIM

Description: Used for mid-wall vertical applications to ensure plank and system stability. Can be used at shorter or longer distances to create different design aesthetics.

P11 TWO-PIECE J TRIM

Description: Two-piece J Trim for the top edge of doors, windows, or wall siding.

P10 INSIDE / OUTSIDE CORNER

Description: A versatile two-piece trim designed for easy to install for your project's corners on both the inside and outside. When the inside/outside corner is reversed, the inside corner top cap becomes the outside corner back plate.

P22 PLANK CLIP

Description: Fastened directly to all vertical backplates, the Plank Clip is used to create a 3/8" air cavity exceeding most building code rainscreen requirements. The Plank Clip prevents planks from buckling, eliminates fixed fasteners, and they slide to allow for expansion and contraction. (Quantity per bag = 100)

P23 PLANK CLIP

Description: Used when joining two planks together. Planks come in 16' lengths and can be joined together with a plank connector for a maximum length of 32'. (Quantity per bag = 50)

P30 PLANK BACKER

Description: Plank backers hold the bottom edge of the first plank for a flush appearance and at the top edge of the last plank flush to the main surface of the wall. (Quantity per bag = 50)
