

GatorBar Fiberglass Rebar

GatorBar is a Glass Fiber Reinforced Polymer (GFRP) rebar that extends the life of concrete projects such as slab on grade, floors, patios, and parking structures. Gatorbar is 2x stronger and 7x lighter than traditional steel rebar. (25 pieces of number 3 GatorBar only weighs 47 pounds and is easily carried by one person, in comparison to the equivalent of steel rebar weighs over 300 pounds) GatorBar can be walked on and driven over by vehicles, it will spring back staying centered in the slab. GatorBar is cheaper than steel and will not corrode in high chloride applications which keeps the budget on track while resulting in a concrete that outlasts traditional steel-reinforced. GatorBar contains no polyester and meets or exceeds all ACI and ASTM certifications for flatwork.
