responsible forestry

ARAUCO.

With its high-quality faces and stable composed-core construction, ARAUCOPLY offers a mix of Sanded, Beaded and Siding plywood that delivers the flatness and stability needed for casework, underlayment, coffered ceilings and other high-performance applications, inside and outside. All our panels are made from certified, sustainable plantation-grown pine, so they perform right for the environment as well.

ARAUCO

For more than 45 years, ARAUCO has been driven forward by its vision of being a global leader in the development of sustainable forest products, which has allowed us to become one of the largest and most respected forestry companies in the world.

ARAUCO's success is based on satisfying our customers with quality products and services while balancing the company's needs with those of our employees, the environment, and the people who live near our facilities and plantations. This is the starting point for the responsible and efficient management of our natural resources, the occupational health and safety of our workers and our active contribution to social development and welfare in the communities in which we operate.

All ARAUCO-branded products sold in North America originate in sustainably managed plantation forests in Chile, Brazil, Argentina, and Uruguay. No native forest wood or genetically modified trees are used to produce any ARAUCO product.
