

CEDAR

Interfor Special APPEARANCE GRADE TIMBERS

Interfor Special Appearance Grade Timbers add a unique warmth and rustic charm to interior and exterior projects alike. A superior Western Red Cedar product, these no-hole timbers meet many appearance applications, and protect against decay and insects naturally. As one of the world's largest suppliers of Western Red Cedar, Interfor has a reliable fiber supply to provide the perfect product when it is needed.

Interfor Special APPEARANCE GRADE TIMBERS

Best Choice for Appearance

Interfor Special Appearance Grade Timbers offer the ultimate in quality appearance, and are manufactured to exacting standards through our sawmill and planer facilities. They are the top choice of builders for interior decorative timbers or large-scale exterior structures.

Western Red Cedar delivers beauty, rich color and exceptional building properties. Properly finished and maintained, it ages gracefully and lasts for years.

Best Choice for Quality and Performance

One of the easiest woods to work with, Western Red Cedar is dimensionally stable, lightweight, strong and versatile, and is naturally resistant to decay and insect damage. Materials stay straight, lay flat and provide an excellent base for paints and stains.

Interfor Special Appearance Grade Timbers are easy to saw and glue, and accept nails and other fasteners. They feature straight, even grain and uniform texture, and are the perfect fit for engineered applications where strength and appearance are both required.

Best Choice for the Environment

Wood from responsible sources is by far the best building choice. Wood grows naturally, it is recyclable and renewable, and its cellular structure captures and stores carbon. Interfor meets the highest environmental standards, and our Western Red Cedar comes from forests in British Columbia that are third-party certified.

Western Red Cedar's natural preservatives protect against decay and insects so harmful chemical treatment is not needed.

Imperial Size (nominal inches)	Imperial Size (actual inches)	Dressing	Pieces per package	Length** (feet)
4x4	3 5/8 x 3 5/8	S4S	91	8 - 20 ELO
4x4	3 3/4 x 3 3/4	Rough	72	8 - 20 ELO

12x12	12x12	Rough	8	8 - 20 ELO

* Dressed timbers are available on a custom order basis.

** Longer lengths available upon request 22' through 32'.

Finishing and Maintenance:

- Western Red Cedar is pitch and resin-free, making it an excellent base for paints and stains.
- Western Red Cedar should never weather for more than two weeks before finishing. All finishes adhere and perform better when applied to fresh, unweathered wood.
- Power washers are not recommended for use on Western Red Cedar.
- For best results, Western Red Cedar should be coated on all sides before installation. Factory finishing, where available, is preferred.
- Corrosion-resistant nails such as hot-dipped galvanized aluminum and stainless steel are recommended.
- More detailed information about finishing and maintenance is available from the Western Red Cedar Lumber Association website at www.realcedar.com/resources/brochures-literature/.

Interfor is a growth-oriented lumber company with operations in Canada and the United States. The Company has annual production capacity of 3 billion board feet and offers one of the most diverse lines of lumber products to customers around the world.
