

C&BTR S4S Douglas Fir

C&BTR S4S Douglas Fir originates in the forests of the Pacific Northwest and British Columbia. It is fiber that has been prized for generations for its beauty, strength, and suitability for a wide variety of applications. Pound for pound, Douglas Fir is one of the strongest woods in the world, and its rich yellow-orange hues & exceptional workability make it popular for doors, windows, floors, and interior and exterior trim. C&BTR S4S Douglas Fir comes with a molded S4S surface and eased edges. It is nicely packaged in 1000 board foot random length units, but is also available in job pack quantities.
